

Year 6 Homework Projects—Autumn 1

Choose one homework project to complete each fortnight. Record any new learning, tasks or projects in your journals to be marked. Be as creative as you can! Hand in on the following dates:

Friday 22nd September

Friday 6th October

Friday 20th October

Science:

Explore the human body using this fantastic online resource. Make sure to focus on the circulatory system.

Choose how to display your learning in your project journal.

Maths:

Try this game to practise comparing numbers. Write down 10 numbers up to 10,000,000 and the '>' and '<' symbols on separate pieces of paper. Ask your parent/carer to deal you two numbers, face down. Ask them to turn over the pieces of paper. Use the '>' and '<' symbols to show which number is bigger or smaller.

If you want an extra challenge, you could set a timer! How many pairs can you order correctly in 30 seconds? Can you put all of the numbers in order? Can you explain how you ordered the numbers?

Computing:

Following our E-Safety lessons at school, create a poster giving people top tips for staying safe online.

Geography:

Before we head off on residential, can you use Google Maps to explore Aylmerton and the surrounding towns and villages? How long will it take to get there? How many miles is it from Grantham?

Art:

Use the following website to research the famous graffiti artist, Banksy.

[Banksy: Who is the famous graffiti artist? - CBBC Newsround](#)

Create a fact file all about him.

English:

Write your own horror story.

Where will it be set?

Who/what will the main character be?

What will make the story spooky or scary?
