Science : Animals including humans

Year 1

Spring 1

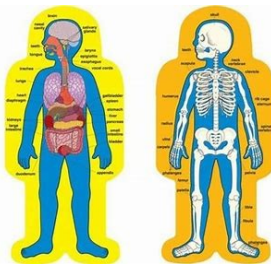

What will I know?

Humans are mammals, which means they have fur/hair and feed milk to their young.

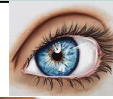

Mammals have a skeleton inside them which includes a backbone because of this they are called vertebrates.

Mammals also have organs inside.

Vocabulary

sight

When eyes are used to see things.

smell

The nose is used to sense smells.

hearing

Ears are used to hear sounds.

taste

The mouth and tongue are used to taste things.

touch

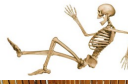

The skin senses when things touch it.

torso

Middle part of the body.

skeleton

Bones inside the body.

mammal

Animal with fur or hair that feeds its young milk.

organs

Body parts which are inside the body and help keep us alive.

ear

head

eye

nose

mouth

torso

skin

arm

hand

leg

knee

foot
