

In Science this half term, we will be learning about food chains. Research the food chain for your favourite animal and present it in an interesting way. Here are some ideas.

In History, we are learning about famous nurses from the past and how they have influenced our life today. Create a fact file about Florence Nightingale or another famous person from the past who has helped us. Think about how they have affected our lives today.

In Maths, we will be learning about 2D and 3D shapes. Why not create your own shape art similar to Paul Klee's Sun and Castle art work.

How many 3D shapes can you find around the house? Can you describe them?

In English, we will be focusing on the text 'Stardust' by Jeanne Willis. What do you shine in? Is it art or sport? Do you play a musical instrument? Can you dance? Showcase your talents and send in a picture or video to share with the class!

In DT, we will be using our learning about a healthy balanced diet to design a healthy meal. Have a go at helping out in the kitchen or plan and cook a healthy meal for your family.

Go on a walk in nature. Can you spot any signs of Spring?
