Year 3 Homework
Autumn 1

These are the homework tasks for this term. Please complete at least one task every two weeks and bring your work into school for me to see.

Science Task Create a skeleton and label as many bones as you can. This could be a drawing or something more creative and 3D. 	**English Task** Later in the term we will be writing a set of instructions. Can you find any instructions at home for any toys or games you have. Maybe your parents have instructions for tools they own or how to put together a piece of furniture. Which instructions are easy to follow and why? Can you write your own set of instructions to explain how to do something. It might be how to play a game, how to sew, how to draw a picture, how to make a sandwich or anything else you can think of.	**Reading Task** To read at least 3 books before October half term and take a picture of you reading them. Remember to read books in your reading level and quiz them once you have finished. 
History Task Create a fact file about the Stone Age. 	**Maths Task** Use TTRS regularly to practise your 3, 4 and 8 times tables. You could also write down the multiplication and division facts for the 3, 4 and 8 times tables.	**PE Task** Keep a record of how active you are outside of school time. What sports do you do? Can you learn a new sport? Maybe take some pictures or write about what you have been up to. Maybe you could teach us all a new skill.
